## GRAZE LIVESTOCK LONGER

Extending the grazing season is an easy way to save time and money during colder months versus alternatives.

### Grazing Windrows (Swath Grazing)

Swath grazing uses annual crops like cereals or forage that are cut in the fall and left in the field for cattle to graze directly. It improves soil fertility by directly depositing manure and trampled feed residue.

### Bale Grazing

Bale grazing is a cost-effective, time-saving way to get your herd through frigid, long Prairie winters. It involves strategically placing bales of hay or forage in designated areas and allowing cattle to graze from them, saving you labour, fuel and manure management costs.

### Stockpiling Forage

Stockpiling extends the grazing season for cattle beyond the growing season by saving pasture for winter use. It involves allowing forage to accumulate and mature in the fall, then grazing the stockpiled forage during the dormant season, often into the early winter. This method can reduce the need for supplemental feeding and save money on hay costs.

Selection may vary by store.

Beat the summer heat with Interstate. Interstate batteries keep your vehicle ready for every summer adventure and every job.

## Quick Battery Test

Make sure your Interstate battery is ready when you are.

### Look

Check the terminals. They should be clean, tight and corrosion-free. Cracks or swelling? Replace your battery.

### Check Voltage

Use a digital multimeter (DC Volts). A healthy 12-volt battery should read 12.6V or higher.

### Quick Load Check

Above 12.2V? Battery is holding power. Below 12.2V? The battery might be losing life.

### Need Help?

Visit your local UFA to assist with warranties, battery selection & more.

## RIGHT BATTERY, RIGHT AWAY.

Scan the QR code, punch in your vehicle info, and let Interstate's Battery Finder do the work.

## All-Purpose Portable Loading Chute

**\$7,699.99** REG. \$8,299.99

1141154. Available at select locations. In-stock quantities.

The All-Purpose Portable Loading Chute is a unique design to be used with ease for the everyday stock trailer and also accommodate any large pod trailer. The simplicity of winching to a desired height and a quick adjustment to the leveling jacks allows you to be ready for use in a matter of minutes. Full rubber floor. Loads from 12" to 49" high. The unique self-leveling entry & exit pillars are designed to adjust to the angle of the trailer to maximize safety and flow to loading and unloading. With an access door and an advancing slot on the loading side, this loading chute will minimize the stresses of moving your cattle from one location to another.
