Vitamin D (min) .....	10,000 iu/kg	Pantothenic Acid (min) .....	20 mg/kg
Vitamin E (min) .....	250 iu/kg	Menadione (min) .....	0.5 mg/kg
		Vitamin B12 (min) .....	50 µg/kg

### **FEEDING DIRECTIONS:**

Place ProStock Horse Mineral Supplement Tub in pasture areas where horses congregate. Adult horses should consume 0.5kg (1.1lb) per head daily. Monitor consumption and move tub farther away from heavily used areas if consumption is too high and closer to water source if consumption is too low. Consumption will vary depending on whether horses are on pasture or in confined pens, and on age and size of horse. Place one tub for every 5 horses and place tubs far enough apart to prevent dominant horses from controlling more than one tub. Feeding vitamins other than vitamin A, D, E, riboflavin, pyridoxine, and thiamine to horses may not have a beneficial effect. Contact a ADM Animal Nutrition representative for more information.

### **CAUTION:**

- 1) Directions for use must be carefully followed.
- 2) Consumption of this product by sheep or goats may result in copper toxicity.

### **PRÉCAUTION:**

- 1) Le mode d'emploi doit être soigneusement suivi.
- 2) La consommation de ce produit par les moutons ou les chèvres peut entraîner une toxicité du cuivre.

Individual results from the use of this product may vary due to management, environmental, genetic, health and sanitation differences; therefore, ADM Animal Nutrition does not guarantee individual results.
