15 – 50 gallons	(57 – 190 L)	2 – 4 ounces	(59 – 118 mL)

For Best Results: Flat fan spray nozzles are recommended when applying BLUE TRAX HC. Application equipment should be clean, in good operating condition, and properly calibrated to deliver the recommended spray volume per measured area treated. Increasing the total volume of spray solution will enhance the visual marking of non-uniform surfaces, such as longer or thinner stands of turf, or applications made over a broad range of ornamental vegetation and tree canopies.

STORAGE AND DISPOSAL

STORAGE: Store in cool, dry place. Store in original container. Keep container tightly closed. Do not reuse empty container.

DISPOSAL: Do not contaminate water, food, or feed by storage or disposal. Wastes may be disposed of on-site or at an approved waste disposal facility. Triple rinse (or equivalent) adding rinse water to spray tank. Offer container for recycling or dispose of container in sanitary landfill, or by other procedures approved by appropriate authorities. Recycling decontaminated containers is the best option of container disposal.
