FEEDING INSTRUCTIONS:

AGRI-BLOK™ 20% Range Sheep Supplement Block has been formulated to balance the diet of sheep on range. Blocks should be placed near water or loafing areas to assure maximum exposure to sheep. Place 1 x 25 Kg block for every 25 sheep every 10 days. Regulate the blocks in this manner so that intake would be approximately 0.1 Kg per head per day on mature sheep. The cardboard containers can be removed from the block or left on as a feeder. NOTE: Because AGRI-BLOK™ is offered free-choice, intake may vary due to various circumstances, therefore, one should monitor intake to achieve the best nutritional and economic benefits from your AGRI-BLOK™ feeding program.

CAUTION:

- 1) Directions for use must be carefully followed.
- 2) Because this feed contains added copper and selenium, a proper evaluation on local requirements must be made by a qualified veterinarian or nutritionist prior to use of this product.
- 3) Do not use this feed in association with another feed containing supplemental selenium and copper.
4. Individual results from the use of this product may vary due to management, environment, genetical health and sanitation differences, therefore, Canadian Agri-Blend Inc. does not warrant or guarantee individual results.
