Vitamin A (Min) .....	176,000 IU/kg
Vitamin D <sub>3</sub> (Min).....	17,600 IU/kg
Vitamin E (Min).....	220 IU/kg

A list of ingredients contained in the feed may be obtained from the manufacturer or registrant.

## FEEDING DIRECTIONS

Feed ProStock 20% Cooked Tub free-choice to beef cattle on pasture or roughage rations. Make sure animals have adequate pasture or roughage available and are not starved for salt or minerals. A two week adaptation period may be required to establish a base consumption. Expected consumption of ProStock 20% Cooked Tub is 0.34 kg per head daily for a mature cow. A 10-day supply of Prostock 20% Cooked Tub may be put out at one time. Provide at least one tub for every 15 to 20 animals. If consumption of ProStock 20% Cooked Tub is lower than desired, be sure other sources of salt and/or minerals are not available and move tubs to areas more frequented by cattle. If consumption of the tub is higher than desired, feed additional salt or mineral and move tub to areas less frequented by cattle.

If pasture and/or roughage supply inadequate energy for satisfactory growth, performance or body condition, supplemental grain or good quality roughage should be fed.

CAUTION: 1.Directions for use must be carefully followed. 2. Do not use in association with another feed containing supplemental selenium. Consumption of selenium should not exceed 3 mg per head daily. 3. Consumption of this product by sheep or goats may result in copper toxicity.
