Vitamin D (minimum) .....	20,000 IU/kg
Vitamin E (minimum) .....	237 IU/kg

## INGREDIENTS

A list of the ingredients used in this feed may be obtained from the manufacturer or registrant

## INSTRUCTIONS FOR FEEDING

Feed ProStock Mineral Tub free-choice to beef cattle on pasture or roughage rations. Make sure animals have adequate pasture or roughage available and are not starved for salt or minerals. A two week adaptation period may be required to establish a base consumption. Expected consumption of ProStock Mineral Tub is 0.06 kg per 100 kg body weight daily, or 0.35 kg (0.77 lb) per head daily for a mature 600 kg cow.

If consumption of ProStock Mineral Tub is lower than desired, be sure other sources of salt and/or minerals are not available and move tubs to areas more frequented by cattle. If consumption of ProStock Mineral Tub is higher than desired, feed additional salt or mineral and move tub to areas less frequented by cattle. A 10-day supply of ProStock Mineral Tub may be put out at one time. If pasture and/or roughage supply inadequate energy for satisfactory growth, performance or body condition, supplemental grain or good quality roughage should be fed.

**CAUTION:** 1.Directions for use must be carefully followed. 2. Do not use in association with another feed containing supplemental selenium. 3. Consumption of this product by sheep or goats may result in copper toxicity.
